

Badia Grissa

Gameplay Engineer

bediyagrissa@gmail.com |  +216) 56 180 295 | [LinkedIn/me](#) | [GitLab](#) | [Github](#) | [Credly](#)

SUMMARY

Software Engineer with over 4 years of experience as a Gameplay Engineer specializing in Unreal Engine 5/4 and Blueprint scripting. Skilled problem solver with strong teamwork, communication skills, and a reputation for being easy and fun to work with.

WORK EXPERIENCE

Founder - Sole Gameplay Engineer (Self-Employed - Full time) IndieKatz (Sousse, Tunisia)

Jul 2026 – Present

- Provide Gameplay Engineering services.

Keywords: Unreal Engine, Blueprints, C++, Replication, Source Control, Optimization, LODs, Profiling, Debugging, Communication.

Unreal engine Gameplay Engineer (Remote - Full time) Earthlings.Land (Hilversum, North Holland)

Jul 2025 – Apr 2026

- Optimized assets, verified collision accuracy, and assigned Level of Details (LODs) to enhance performance.
- Resolved blueprints errors and scaled features to meet project requirements, improving overall functionality.
- Developed authoritative multiplayer systems by converting UI designs into C++ menus, utilizing Server, Client, and Multicast RPCs to ensure synchronized state across the network.
- Conducted performance profiling and implemented optimization techniques to enhance asset efficiency.
- Rapidly prototyped interactions and streamlined workflows to facilitate efficient development.
- Engaged in catch-up meetings to discuss project progress and outline upcoming tasks.
- Collaborated with team members to ensure alignment on project goals and deliverables.

Keywords: Unreal Engine 5, Blueprints, C++, Replication, Perforce, Optimization, LODs, Profiling, Debugging, Communication.

Lead Gameplay Engineer (Remote - Part time) IMU Studios (British Columbia, Canada)

Sep 2024 – Dec 2025

- Led a team of 8+ developers to create an immersive FPS experience, driving project success.
- Reviewed code and provided feedback to ensure adherence to industry standards and design patterns.
- Collaborated with designers to translate gameplay concepts into actionable tasks.
- Developed rapid prototypes and innovative solutions to enhance gameplay features.
- Utilized software development tools for efficient project management and team collaboration.
- Organized and participated in cross-disciplinary meetings to assess feature feasibility.
- Executed programming tasks, optimized systems, and resolved issues to ensure seamless gameplay.

Keywords: Unreal Engine 5, Blueprints, Subversion, Optimization, Profiling, Debugging, Communication, Leadership.

Gameplay Engineer (Onsite - Full time) Lanterns Studios (Tunis, Tunisia)

Jan 2022 – Aug 2024

- Collaborated with the creative team to design and implement high-end gameplay logic for immersive VR experiences.
- Engaged in daily and weekly meetings to identify risks, devise solutions, and streamline workflows for level designers.
- Reviewed code to provide technical feedback and supervised interns in documentation and coding best practices.
- Contributed to rapid prototyping and integrated third-party SDKs to enhance platform compatibility.
- Utilized Perforce for version control to ensure project stability and code integrity.

- Led the development and optimization of VR simulations for piloting, boating, and driving experiences.
- Facilitated training sessions to promote best practices among team members.

Keywords: Unreal Engine, Blueprints, C++, Visual studio, perforce, VR, Multiplayer, Optimization, Debugging, Communication.

University Instructor (Onsite - Part time)

Sep 2022 – Jan 2023

Higher Institution of Arts and Multimedia of Manouba (Manouba, Tunisia)

- Introduced university students to coding fundamentals using C++ and Unreal Engine.
- Challenged students to apply their skills in problem-solving and creative thinking.
- Mentored teams in developing projects that integrated their learning and expanded their skills.
- Guided students from raw C++ basics to Unreal Engine fundamentals, culminating in a small project.

Keywords: C++, Visual studio, Unreal Engine, Teaching, Communication, Debugging.

End of Studies Internship

Feb 2021 – Aug 2021

Multi-Disciplinary International School (Sousse, Tunisia)

- Developed core functionality of a game/physics engine using OpenGL, enhancing understanding of game engine mechanics.
- Explored the inner workings of game engines to deepen knowledge of computer graphics and physics simulation.
- Employed C++ and Visual Studio to implement engine features, focusing on optimization and debugging.
- Utilized Git and GitLab for version control, ensuring efficient collaboration and project management.

Keywords: Computer graphics, C++, Visual studio, OpenGL, GLM, GIT, GitLab, CMake, Optimization, Debugging.

SKILLS

- | | | |
|----------------------|-----------------------|----------------|
| • Unreal Engine 4/5 | • Blueprint Scripting | • C++ |
| • Visual Studio | • Version Control | • Git |
| • Subversion | • Github/Gitlab | • Perforce |
| • Multiplayer | • Optimization | • Debugging |
| • Tutoring/Teaching | • Communication | • Teamwork |
| • Project Management | • Leadership | • Coordination |

EDUCATION

Master's of Software Engineering

Sep 2016 – Sep 2021

Multi-Disciplinary International School (Sousse, Tunisia)

Technician of Industrial & Automations in IT

Sep 2014 – Sep 2016

Professional Training Center of Sousse Section in Electronics (Sousse, Tunisia)

VOLUNTEER WORK

- | | | |
|-----------------------------------|--|--------------------|
| Organizer and photographer | Tunisian Collegiate Programming Contest (Sousse, Tunisia) | Jun 2023, Sep 2022 |
| Head Organizer GGJ Sousse | Gaming Freaks Tunisia (Sousse, Tunisia) | Feb 2023, Feb 2019 |
| Video editor (reels) | Africa and Arab Collegiate Programming Championship (Sharm El Sheikh, Egypt) | Dec 2023 |

Languages

- | | | |
|----------|----------------------|-----------------------|
| • Arabic | • English (IELTS B2) | • French (TEF-Can B2) |
|----------|----------------------|-----------------------|
